

CSS GeoSpatial is an ISO 9001:2015 certified organization having specialization in Consulting, Services and Support – the three most important factors that drive the entire IT and GeoSpatial Industry. We value our customers and value their ideas. At CSS, we are committed towards attaining the ultimate goal of the end user and not only serving him with a few box solutions. Our core competency is in providing solutions across the entire GeoSpatial value chain - from data conversion to application development, to modeling, analytics, and consulting. We boast of our ability to offer complete solution, comprising data, software and consulting under one roof.

CSS boasts to have the best team capable of executing a project from a sheer concept to the end solution. Our highest quality services ensure customer's comfort, cost benefits, schedule and budget targets, and confidentiality and security issues. Starting from Simple data conversion to Application Development to GIS and Image Processing to Field Survey, CSS proudly ventures in the entire services domain with perfection.

CSS offers a wide range of GeoSpatial Application solutions from Industry standard Brands for ready usage of our Customers. Based on the user requirement we provide exact and optimum solution to fit the technical expectation as well as the budget. We offer Desktop GIS Solution as well as High End Server based Enterprise GIS Application to cater various levels of customer needs. We cater the Industry with best of the Class Surveying Equipments and High end UAV / Drones and Terrestrial Laser Scanners.
